

# LOGISTICAL SOLUTIONS FOR HEALTHCARE

## Healthcare Storage and Organization

In the world of Healthcare, cleanliness is of the utmost importance. That's why we focus on improving sterility and patient safety through optimized logistics. We do this by providing the key elements for each milestone in the sterilization process, from cleaning instrument sets, to handling and transporting them between different departments and storing them for use at a later stage.

### Introducing Belintra.

Belintra has developed a variety of products to serve the needs of specific departments, as well as storage and transportation solutions which can be used across different departments. Patient care items can now be cleaned, transported, stored and organized.

### With Belintra Sterisystem Healthcare Solutions from Patterson Pope you can:

- » Create an ergonomic and hygienic storage solution for sterile packs and containers.
- » Optimize space to store any size sterile pack or container by adding or removing runners in seconds.
- » Eliminate stacking wrapped trays in order to meet Joint Commission Standards.
- » Increase efficiency by easily transferring containers from storage to transport carts.
- » Reduce handling time and damage to wrapped trays and containers, saving valuable time and money.
- » Incorporate stainless steel shelves, baskets and polycarbonate modules to create the perfect modular design solution.

*Thanks to efficient storage and transportation solutions, every healthcare organization can save time and invest more resources towards patient care.*
