LAMINATE

Wilsonart® Laminate. When design matters as much as performance.

As a world-leading producer of decorative surfacing products, Wilsonart delivers a wide range of innovative laminate solutions and related services. With products designed to expand your inspirational horizons, Wilsonart Laminate meets your special needs and exceeds the expectations of your most demanding clients.

Our Sustainability Journey

For more than 50 years, being a responsible member of the global community has been woven into all aspects of our company culture. As our manufacturing and distribution networks have expanded worldwide, our impact on the environment has become an increasingly important concern for everyone at Wilsonart.

Several years ago, Wilsonart took the lead to reshape the supply chain for our paper source, which makes up 70% of our High Pressure Laminate (HPL) product lines. Our technical department worked with suppliers to ensure all source materials such as kraft, pulp, and decorative paper met stringent FSC certification requirements. At the onset of the project, no company in the industry had undertaken this endeavor. Wilsonart was the first North American laminate manufacturer to achieve Forest Stewardship Council® Chain of Custody Certification, providing thousands of SKUs of FSC® Mix Credit Certified HPL.

Our sustainability efforts incorporate not only our impact on the environment, but also our long-term commitment to providing high quality products, reliable services, secure jobs and strong community support. This “full circle” journey will take many forms. Our goals are as follows:

Zero Waste: Eliminate unnecessary materials, processes and waste from the products we make and sell.

Zero Impact: Lead the industry in development and use of environmentally responsible materials.

Zero Barriers: Create an environment of excellence that fosters individual growth and engagement in community and industry development.

Products

At Wilsonart, we continuously strive to improve our products and processes while ensuring minimal impact on the world around us. 34% of fiber used to make Wilsonart Laminate comes from recycled sources. The recycled content in Wilsonart Laminate is certified by SCS Global Services (see third-party certificates online). Our laminates are also UL GREENGUARD Gold Certified for low chemical emissions, which can assist you in earning LEED® certification. All standard Wilsonart Laminates are available on request as FSC Mix Credit, SCS-COC-002415. Wilsonart is proud to be the first adhesive manufacturer to have its low-emitting PVA and woodworking adhesives recognized by UL's GREENGUARD Certification Program for indoor air quality.

Processes

We strive to ensure our manufacturing and distribution processes leave minimal impact on the environment. Our sustainability programs include energy management, waste management, eco-friendly product transportation, and raw materials partnerships with suppliers who are equally committed to sustainable business practices.
