CASEWORK SOLUTIONS

MASTERSERIES

**Smart
Resourceful
Reliable**

Flexible Manufacturing

For over 50 years, HAMILTON has created solutions for document handling in mailrooms and copy centers. We manufacture a line of products that address issues in these active environments.

Our aluminum frame consoles are ideal for high traffic areas. The frames withstand weights in excess of 1,000 lbs. and protect the edges on all laminate surfaces. The consoles may be outfitted with adjustable legs, cable raceways, half or full depth shelves with or without locks, wood-top corners, modesty panel and accessories like dump rims, wheels or your choice of handles. We manufacture to your specifications. We also provide professional design services

Specialty Solutions

The Manifest Shipping Station, pictured above, is in our family of specialty consoles. This 48", 60" or 72" width station manages all automated shipping operations with space designated for a monitor, printer and tray for the keyboard. We also manufacture packaging station consoles, crank adjustable consoles that can have an electrical component, and adjustable scale consoles.

HAMILTON sort modules may be ordered in a myriad of sizes and number of slots. Flexible plastic shelves are available in four colors and standard, legal, oversized and zip sizes. They easily slide into full depth shelf supports attached to our sort modules and are adjustable on 1" intervals. Color coded labels are included for quick, accurate sorting.

An Eye for Detail

The beauty of HAMILTON products is in the attention to detail. The Executive Mail Station, pictured above, is a self-contained mail delivery and collection point with areas for open and locked storage.

Our pin and cam locking system safely secures sort modules at any position on our consoles. The system easily readjusts toward the front or back to accommodate the varying reach of personnel.

HAMILTON bulk sort units may be ordered with angled shelves to facilitate a speedy first sort. Our one-stop-shop carries many essentials including bulk sort bins, anti-fatigue mats, power strips and mail delivery carts.

HAMILTON Solutions at Work
Custom designed and crafted floor-to-ceiling shelves and cabinets house the Cowboys' equipment at the Oklahoma State University's Boone Pickens Football Stadium. The Master Series consoles with stainless steel worksurfaces double as the conference table.

Hamilton Casework Solutions offer GREENGUARD Gold certified products to provide safe, quality, environmentally friendly workspaces. FSC® (FSC-C110583) and OSHPD certified components are also available as specified by a designer.
