

Smart Lockers

FOR ANY SPACE

Create an unexpected convenience and desired experience with networked smart lockers.

When designing a smart building that puts convenience and experience first — spaces start to look different and the way people interact with them shifts. Smart lockers help inform, promote brands, and provide a new level of convenience that should be expected in today's workspace.

Streamlined Experience

Create a practically touchless experience with networked smart lockers. Instead a traditional, battery-operated lock, where there is a shared keypad to type in a 4-digit PIN code, use your RFID media, HID mobile credential on your phone or wearable, or smart phone app to open your locker.

Flexibility & Future-Proofed

Touch-less networked, smart lockers are a flexible solution that easily changes and adapts as your needs change. The flexibility of networked lockers allow for each locker bank to be customized for the user and the purpose the locker is intended to serve. Design the type of user experience that is best for each type of audience using the lockers. Allocate locker banks or even specific lockers to serve as:

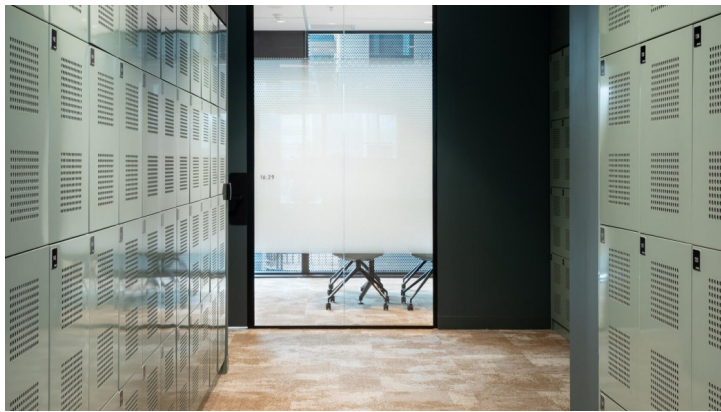

- Temporary, Day-Use Lockers
- Contactless Exchange of Goods Lockers
- Rental Lockers

Locks So Smart They Know When They Need Cleaning

Locks can be configured so that when someone is done using the locker, regardless of the time of day, that locker can automatically become 'disabled' until the cleaning staff has had the opportunity to clean and disinfect the locker. Once cleaned, the locker becomes accessible for use again.

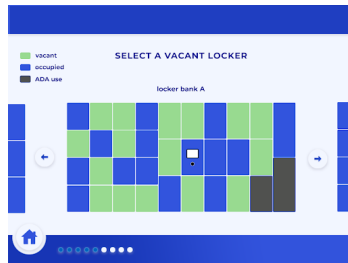

Don't lockers be an afterthought.

Lockers with Data

Administratively, have full control and visibility of all lockers throughout your building(s). Smart locker software allows for easy usage reporting, audit trail that can help with management of each locker on the floor, multiple floors and even multiple buildings.

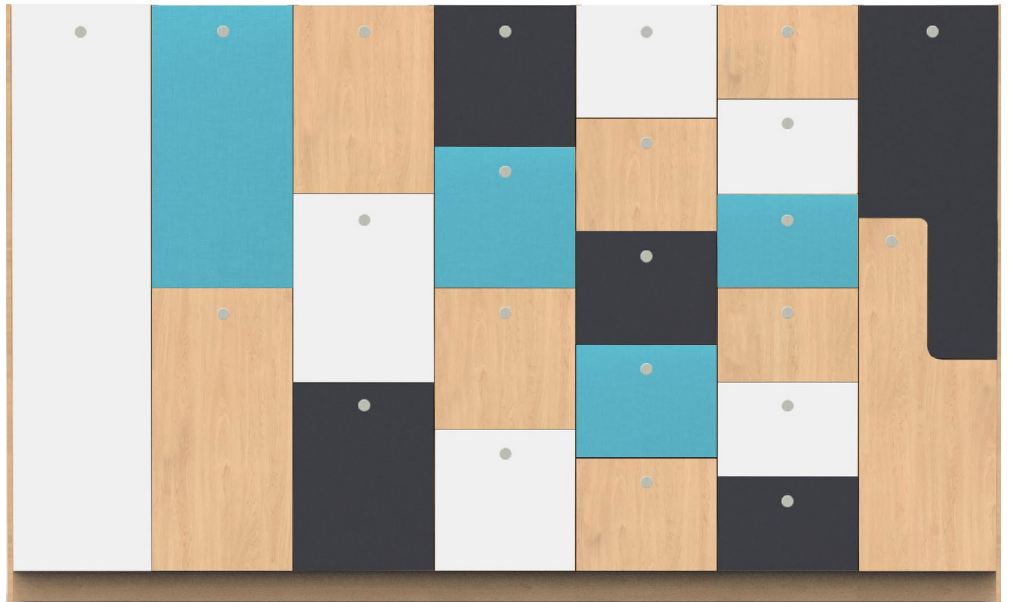

Custom-Designed Display

Our custom-designed displays allow for users to visually see which lockers are available and those in-use, taking the guess-work out of which locker to reserve for the day.

When Custom is the Standard

Lockers can range from single-tier lockers up to 6-tier lockers and even z-lockers as our standard offering. We understand that each application is unique, which is why custom is our standard. Standard locker dimensions can be customized on one inch increments.

*Custom sizes available

Standard Sizes*

Width: 12", 15", 18"

Depth: 15", 18", 20"

Height: 36", 40", 54", 68", 72", 90"

*Custom sizes available

Locker Components & Accessories

Base: Integrated 4" kick base or no base with levelers*

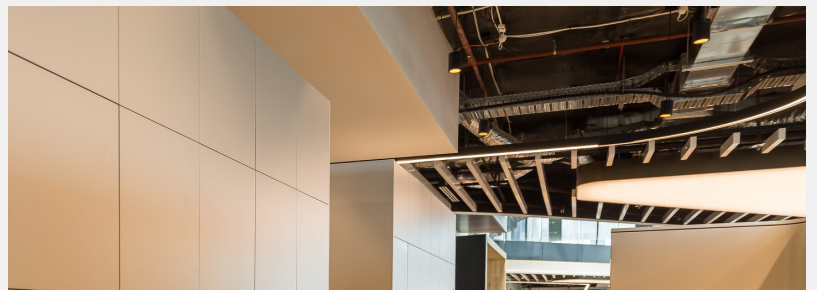

Hinges: Concealed 110-degree, full overlay soft-close hinges

Coat Hooks: Single- or double-prong chrome coat hook

Hanging Rod: 3/4" diameter chrome rod with end supports

Designed for USB Charging and Light

Take advantage of the connectivity of a smart lock with USB charging and light. Charge your phone or tablet and even add light to the locker to ensure users don't leave anything behind.

Create a Custom Design

Wrap the lockers with a graphical wrap to match the space with a typographical quote, specialized numbering or a mural to be your centerpiece of the space.

Alternative Materials

- Bamboo
- Solid-Surface
- Metal
- Textured Laminate
- Laminate
- Vinyl Graphic Overlay
- And more...

Just because it's a locker, doesn't mean it has to look like one.
