ART RACK ACCESSORIES

Saving space and protecting collections

Spacesaver's art racks can be fitted with accessories to securely store artwork and make efficient use of space. The following accessories can be manufactured for use on any variety of our punched screen or woven wire art racks.

HANGER

Hangers are designed to securely hold hanging art. Hangers are available unfinished or with a museum-safe coating to prevent scratching, and they can be used in conjunction with our Art Rack Shelf to provide additional stability and support. Custom hanger designs are available to meet any requirement.

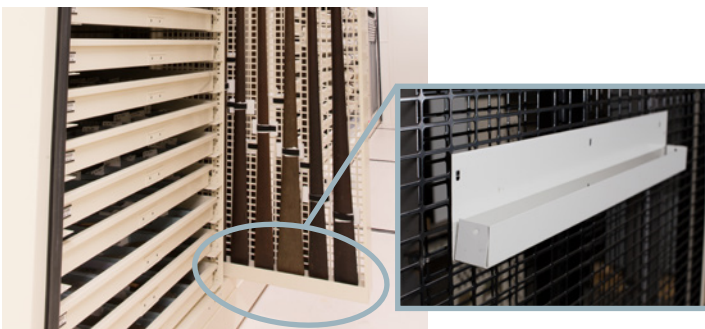

ART RACK SHELF

This shelf is typically used to provide additional support for hanging art. The shelf reduces stress on wire attachment hardware and other hanging apparatus, and it also provides an additional layer of protection in case of wire stretching or hardware failure. The bent lip running along the shelf's outer edge prevents slippage.

ART RACK TRAY

These trays affix securely to Spacesaver art racks and were originally designed to support spear bases. Our clients also use them to store spare hangers and other supplies at the point of need. Custom sizes and designs are available; inquire with your local Spacesaver consultant.

TEXTILE ROLL HOLDER

Our textile roll holders are available with a non-off-gassing powder-coat paint finish, or they can be coated to protect against scratching and abrasion. The holders attach securely to any Spacesaver art rack screen.
