

INFO SHEET

MODULAR BI-FILE®

Maximum Storage. Minimum Floor Space.

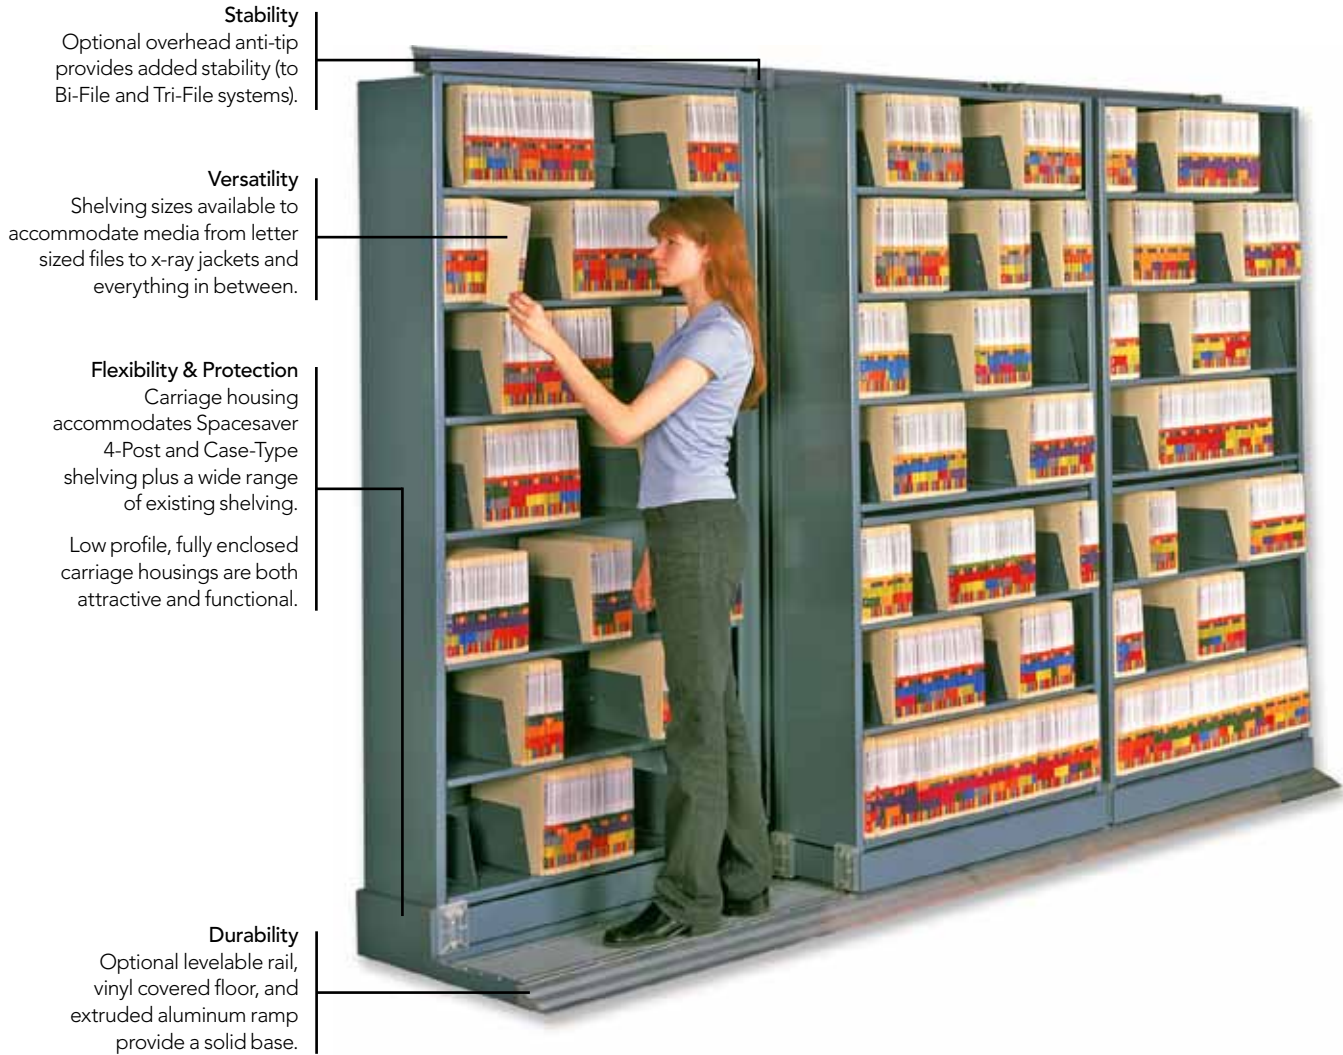

Spacesaver Modular Bi-File (two row) and Tri-File (three row) high-density mobile storage maximizes filing and storage in minimal space. Two rows of filing equipment are placed in nearly the same footprint. The front shelf sections rest on movable carriages that travel back and forth. This movement allows access to the back row of stationary shelving. The result is a high-efficiency storage system that dramatically increases storage capacity over lateral files within a specific area.

FEATURES AND BENEFITS

- Optional overhead anti-tip provides added stability
- Shelving sizes available to accommodate media from letter sized files to x-ray jackets and everything in between.
- Low profile, fully enclosed carriage housings are both attractive and functional.
- Optional levelable rail, vinyl covered floor, and extruded aluminum ramp provide a solid base.
- Carriage housing accommodates Spacesaver 4-Post and Case-Type shelving plus a wide range of existing shelving.

Every component of the Modular Bi-File is designed with ease of installation in mind. From the lightweight floor and rail to the snap together hook and lance construction of the carriage and platform, simplified installation and future expansion and/or relocation are key elements of design. A Tri-File® (three row) configuration is also available.
