

INFO SHEET

ACTIVESTOR®

Filing and storage.

The ActiveStor® personal file management system combines high value, flexibility, safety and security. The system features lateral files, bookcases, storage cabinets and pedestals. ActiveStor units are available in preconfigured or customized versions to meet your specific storage requirements.

FEATURES AND BENEFITS

- Storage cabinets accommodate shelf, wardrobe and media storage requirements.
- Bookcases are available in two depths: 12" (300 mm) for books and 15" (375 mm) for binders. Shelves adjust in 1" (25 mm) increments.
- Lateral files feature unmatched quality, superior strength and increased storage capacity. While preconfigured lateral files provide cost effective solutions for standard requirements, 1-1/2" (38 mm) upright spacing is ideal for nonstandard needs. This concept allows for multiple drawer sizes and custom solutions.
- Pedestals meet virtually any personal storage need. A drawer accessory is available for storage of pens, pencils, clips and other desk items. With a drawer divider system users may configure 6" (150 mm) drawer interiors for disks, microfiche, stationery and miscellaneous items.

Patented interlock ensures user safety by preventing the opening of more than one drawer at a time. The interlock restages automatically to prevent damage to the system.

Heavy-gauge drawer sides are notched to accept legal, letter and metric size hanging folders. Heavy-duty ball bearing suspensions feature bumpers to prevent drawer "bounce back."

Individual lock option provides security for multiple users of the same cabinet. A security pan prevents access from the drawer above.
