

MOBILIZE YOUR STORAGE. MAXIMIZE YOUR SPACE.

ActivRAC® 3M Mobilize Storage Systems provides design flexibility while maintaining stability and durability in light-duty applications.

The ActivRAC 3M Mobilized Storage System for light-duty applications maximizes storage capacity and efficiency. The low-profile carriage moves along rails installed into or on top of the floor to eliminate wasted aisle space and provide full accessibility to stored items.

ActivRAC 3M provides flexibility to expand, move, or re-configure the system, as well as the ability to travel over flat, but non-level floors. The carriages are designed to accommodate new or existing light-duty racking, shelving, or drawer systems, including Spacesaver's Widespan GROW.

STANDARD FEATURES

- 3,000 lbs. capacity per carriage/wheel section
- System can extend up to 60' long
- System flexibility – add on or move carriages to other locations as needed
- Rail options – Choose recessed or surface-mounted rail, with or without anti-tip feature and/or corrosion resistance
- Ergonomic handle moves thousands of pounds with minimal effort
- Designed to work with most new or existing racking, shelving, and drawer systems
- User-activated anti-roll safety lock prevents unexpected carriage movement
- Diagonal carriage bracing maintains alignment over years of frequent use

MECHANICAL ASSIST OPERATION
Three-spoked handle features safety locks and rotating hand knobs for ease of use.

LOW PROFILE
Take full advantage of vertical space with a mounting surface just 4" off the floor.

STORAGE CONFIGURATIONS
Accommodates new or existing racking, decking and shelving, including Widespan GROW.
