

INFO SHEET

Spacesaver's RSD4 Small Evidence Refrigerator

Designed and developed by Spacesaver to satisfy the need for controlled handling of temperature sensitive non-hazardous evidence, Spacesaver has a combination Refrigerator/Locker module for added convenience. This compact refrigerator can now be located in any lower right side 'D' size opening of our standard product line. Established clients may even retrofit their existing system. Keyless button locking systems secure individual refrigerated compartments. Two circulation fans maintain a uniform compartment temperatures. A stand alone, full-sized LARGE unit is also available.
