

SECURE STORAGE

LOCKERS

Choosing the Right Combination

Patterson Pope specializes in helping people effectively store STUFF. This means not just putting things away, but doing it in a way that will make finding and retrieving each item as easy as possible. To help in this pursuit, we offer an assortment of lockers for all places and purposes.

Locker Options

Personal Storage Lockers

Freestyle lockers are a new concept in which modular units are combined in various configurations to store items of varying size and shape. And they are reconfigurable on site for the life of the locker!

Durable Steel Lockers

For sheer strength and the ultimate in theft deterrence, nothing beats steel. We have steel lockers of various sizes locked by either padlocks or combination locks. Configurations are flexible, and basic and custom colors are available.

Modular Laminate Lockers

The modular concept is also used for our line of laminate lockers. These box or Z-style units can be stacked in any configuration. A lifetime warranty is offered, and wood, standard and custom finishes are available.

Smart Lockers

Smart Lockers (Electronic Parcel Lockers) are designed for use in environments like corporate, multi-unit and high-rise residential buildings and dormitories. They provide a more economical method for management and distribution of packages.

Day-Use Lockers

For temporary storage needs, multi-purpose day-use modular lockers fit the bill. Providing protected storage for one cycle, or one person with resetting features.

Power Ready

All Lockers can be designed for modular plug-and-play electrical duplex outlets to bring power to lockers for chargers, laptops, and other devices.
