BUNK LOCKERS for NATIONAL GUARD UNIT

Keeping personal gear organized, secure, and at the ready

When National Guard members are training, they have a lot of demands on their time and attention. Concerns about their gear should be the last thing on their minds.

The Minnesota National Guard wanted to provide its members with a sturdy, secure place to keep their personal gear organized and secure. They wanted the lockers to have the following features:

- Perforated panels for ventilation
- Secure internal compartment on upper shelf
- Secure lower compartment with lift-up lid
- Padlock hasps on door and compartments
- Shelf, hooks, and hanger bar
- Welded construction & double-wall steel door

Spacesaver’s engineering and manufacturing teams created bunk lockers that exceeded expectations, and the lockers were placed between bunks, giving each member a sturdy, convenient place to store gear. Now the bunkhouses are more organized and secure, and members can focus on their training instead of dealing with disorganized storage.
