## SECURE STORAGE IN A DEA FIELD OFFICE

### Storing weapons and gear for the U.S. Drug Enforcement Agency

A Drug Enforcement Agency field office needed storage for duty bags, long guns, and other items. They wanted a durable solution that would make the best use of the available space, so they turned to their local Spacesaver representative to learn more about their options. They ended up choosing three types of Spacesaver products: FreeStyle® Personal Storage Lockers, a custom cabinet for long guns, and a deep shelving unit fitted with frame doors and steel pegboard.

#### **FreeStyle Lockers**

Featuring heavy-gauge steel construction and diamond mesh perforation, the Spacesaver lockers selected for this project

provide secure storage for personal items while still promoting optimal ventilation. Directly below each locker door, the planning team opted for louvered drawers fitted with drying racks, which allow agents to follow best practices for storing body armor. DigiLock technology allows agents to open lockers with a PIN code, and a master badge allows designated supervisors to open any locker in the room.

#### **Long gun cabinet with emergency access**

A tall gun cabinet features individual doors that can be accessed via PIN code, as well as a mechanism that allows a supervisor to open all the doors simultaneously in case of an emergency.

#### **Ventilated cabinet with WeaponWRX® steel pegboard**

A Spacesaver shelving unit was fitted with frame doors in the same diamond mesh perforation as the lockers, creating a counter-height cabinet that's finished with a wooden top. The interior features steel pegboard, which provides a configurable space that accommodates a variety of accessories to compactly store weapons, shields, and breaching tools.

#### **A complete solution, made in the USA**

By choosing Spacesaver to provide storage solutions throughout the locker room, the agency was able to procure high-quality steel lockers and cabinets that were designed, tested, and manufactured in the USA and installed by local factory-certified technicians.
