## MOTORCYCLE PATROL LOCKERS

### Convenient, right-sized lockers promote efficiency

When Salt Lake City began planning a new public safety building in the heart of downtown, all services for the police and fire departments had to be housed under one roof. Space was limited in the expensive urban area, so the design team put a major emphasis on efficiency.

Like many other areas around the building, the motorcycle garage needed to make efficient use not only of limited space, but also of officers' time. That's why the design team opted to install custom FreeStyle® Personal Storage Lockers from Spacesaver in the garage. By installing the lockers right next to the motorcycle parking spaces, officers could eliminate the extra time needed to walk back and forth between duty bag storage and the garage.

*Lockers in the motorcycle garage help officers save time and keep their gear organized.*

Each FreeStyle locker is 90 inches tall and equipped with a variety of features to optimize the space: a **sloped top** to present a finished appearance and prevent officers from storing items on top of the lockers; a **document holder** to keep paperwork organized; an **interior lockbox** to provide an additional layer of security for personal valuables; a **drawer with boot tray** to keep boots separate from clothing and other gear; and a **body armor tray** to allow officers to dry body armor horizontally, as recommended by the manufacturer. The lockers are secured with combination locks.
