

NAVSEA APPROVED FOR SHIPBOARD USE:

- ✓ MIL-DTL-901E
- ✓ MIL-STD-167-1A
- ✓ OPNAVINST 5530.13C

Reference 9760 Ser 05Z/368 and 9760 Ser 05Z/377

INFO SHEET

STORAGE SYSTEMS

SHIPBOARD UWR® STORAGE SYSTEM

Designed with the military in mind, the Shipboard UWR® is the most flexible, space-efficient, weapons security storage systems available today.

DESIGNED TO BE READY.

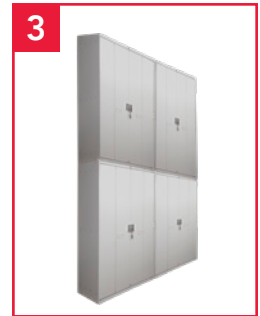

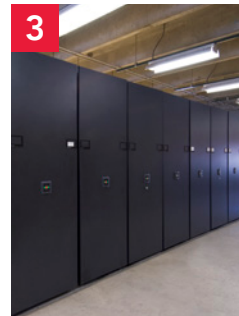

The Shipboard UWR storage system is ready to securely store a variety of weapons from rifles to side arms, gear bags to optics, all utilizing the same cabinet frame. The Shipboard UWR storage system combines thoughtful design and unmatched features to create a system that's thoroughly dependable and instantly deployable under any circumstance.

BENEFITS

1. **Security:** Retractable doors and lock rods provide weapon security, according to specific military requirements for the physical security of conventional arms, ammunitions and explosives (OPNAVINST 5540.13C, AR190-11, DOD5100.76-M, MIL-DTL-901E, and MIL-STD-167-1A).
2. **Durability:** Fully welded, 14-gauge cabinet provides long-lasting service even under the toughest conditions.
3. **Space-Efficiency:** Modular, stackable design maximizes armory storage space. Cabinets may be ganged together or used in a Spacesaver high-density mobile storage system.
4. **Flexibility:** "A la carte" configurability accommodates the storage of a wide variety of weapon types, gear, optics and spare barrels.
5. **Protection of Weapons:** All components that come into contact with the weapons are either dipped in a black poly vinyl chloride (PVC) coating or are made with an injection-molded thermoplastic to protect the weapons from abrasions.

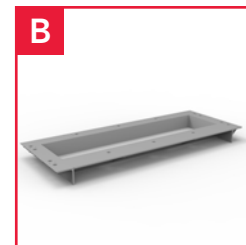

DESIGN AND CAPABILITIES

Cabinets and interior accessories are totally reconfigurable, permitting innumerable weapon storage configurations. For long weapon storage, use a minimum of the following components: one (1) cabinet, includes (1) base, one (1) back panel and the quantity and type of barrel supports and pairs (1) of stock cups equal to the quantity of guns to be stored.

A. Cabinets

The fully welded, 14-gauge steel cabinets are available in multiple heights to accommodate weapons of varying lengths. All standard cabinets are 42.38" (1076mm) wide and 16.25" (412mm) deep. Built-in, folding, retractable cabinet doors retract completely inside the cabinet when fully open, so there are no swinging doors obstructing the aisle way. The doors, sides and back of the cabinet are solid panel construction to maximize security of stored weapons. The doors have heavy-gauge steel and lock rods, providing maximum security.

B. Base

Fully-welded base is required on all Shipboards. This base is designed to be welded to the floor of the ship to provide maximum stability for cabinet and weapons stored inside.

C. Universal Base

The full-width bases are mounted inside the floor of the cabinet and serve as a rest for weapon stocks. The universal base, available for the standard cabinet, with its individual stock support slots can accommodate many weapons by merely changing the location of the stock cups.

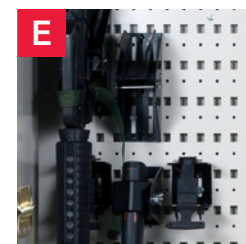

D. Back Panel

The versatile powder-coated full-height back panels mounts in the back of the cabinet. Interlocking keyhole slots accommodate all of the Spacesaver accessories for infinite configurations.

E. Barrel Supports & Transportability Barrel Supports

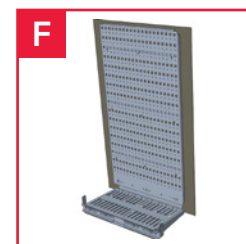

Multiple heavy-duty barrel supports have been approved by NAVSEA and are available for the Shipboard UWR. These supports are coated with vinyl and employ straps to hold weapons securely in place and ensure protection of the weapons during storage at sea. Multiple types of barrel supports may be used within the same Shipboard for flexibility in weapon storage allowing maximum capacity.

RETROFIT KITS

F. Stowage Retrofit Kit for DDG Ships

Spacesaver Retrofit Kits for DDG Ships provide a NAVSEA-approved solution for existing shipboard weapon lockers by adding a UWR back panel and base. Once installed, these allow the NAVSEA-approved weapon accessories to be used inside existing non-Spacesaver lockers. Ideal for situations where organization capabilities are needed, but a full install of the Shipboard UWR Storage System is impossible. Contact Spacesaver for custom applications outside of the DDG Ships.

APPLICATION

The Shipboard UWR is designed to be used either as a stand-alone unit or multiple racks may be stacked or ganged together on the floor or within Spacesaver mobile storage systems. NAVSEA approved weapon brackets for the following weapons; M2, M4, M14, M16, M500, M240B, MK19, GAU17, GAU16, GAU21, SMAW, and Pistols. Customized application storage solutions are available for other weapons. Please contact Spacesaver with weapon information.

HEAVY-DUTY SHIPBOARD UWR ACCESSORIES APPROVED BY NAVSEA

Weapon Type	Part Number	Description
Standard rifle (M4) (M16)	UWRHDSTDK1	Heavy Duty UWR components for standard rifle storage (1 pair of base stock cups and 1 barrel support)
M2	UWRHDM2K1	Heavy Duty UWR components for M2 storage (1 receiver and 2 spare barrels)
M240B	UWRHDM240BK1	Heavy Duty UWR components for M240B storage (1 pair of base cups and receiver mount)
Pistols	UWRHDPSK1	Heavy Duty UWR components for pistol storage
MK19	UWRHDMK19K1	Heavy Duty UWR components for MK19 storage
GAU17	UWRHDGAU17K1	Heavy Duty UWR components for GAU17 storage
GAU16 or GAU21	UWRHDGAU1621K1	Heavy Duty UWR components for GAU16 or GAU21 storage
SMAW	UWRHDSMAWK1	Heavy Duty UWR components for SMAW storage

STANDARD UWR ACCESSORIES APPROVED BY NAVSEA

Standard rifle (M4) (M16)	UWRINVWPKT	Support inverted weapon kit, UWR, transport
	UWRINVWPKEXT	Support Inverted weapon kit - extended, UWR

READY AND SECURE

The Shipboard UWR storage system combines thoughtful design and unmatched features to create a system that’s thoroughly dependable. Maintaining the highest level of security, Spacesaver’s Shipboard UWR is NAVSEA approved for shipboard small arms stowage and meets the shock (MIL-DTL-901E), vibrate (MIL-STD-167-1A) and forced entry/intrusion requirements (OPNAVINST 5530.13C)*. We’re committed to working side-by-side with you to streamline processes, ensure accountability, and make the most of your limited space. Best of all, you can rely on your nearby Spacesaver consultant to explain your options and design a system that’s a perfect fit for your requirements.

Designed to be ready...because you helped build it.
