

# WHEELCHAIR STORAGE

## PROTECT YOUR INVESTMENT STORE MORE IN LESS SPACE

### Wheelchair Lifts

Are powered and folding wheelchairs consuming your floor space? Reinvent your wheelchair storage areas, and put unused vertical space to work for you.

The ability to protect and quickly access out-of-service wheelchairs goes a long way towards ensuring a positive patient experience, not to mention the money savings involved with freed up space. Wheelchair storage solutions from Lift and Store are available in wall-mounted units. Each eight-foot long unit houses six regular powered wheelchairs. Each four-foot unit holds up to six folded wheelchairs. Every unit is easy and safe to operate, allowing employees an efficient way to store and retrieve wheelchairs.

### Overview:

- » Units save valuable floor space.
- » Units are low voltage and reliable.
- » Units are simple and safe to use.
- » Units have an up-down switch that delivers chairs to employee
- » Units are considered an electrical appliance not a building improvement
- » Eight-foot units store six regular powered wheelchairs
- » Four-foot units store six folded wheelchairs

*Let's face it; wheelchairs are too valuable not to have a proper home when they aren't in use or when they are waiting on maintenance and repairs. The wall-mounted wheelchair lift is the answer.*
