MODULAR UTV RACK

Sturdy, stackable units save space in storage and during transport

Spacesaver's Mobility Crate is a modular storage solution that provides secure and ready storage for utility terrain vehicles (UTV). Developed in collaboration with the U.S. military, this stackable, mission-ready system greatly reduces the square footage needed to store UTVs and other equipment.

The system is:

- Collapsible for efficient shipping and storage
- Dual-entry, with accessibility for functional tests during storage
- Stackable up to 3 high
- Galvanized for long-term interior or exterior use

The Mobility Crate is a modular storage solution that can be stacked up to 3 units high.

The racks' structural steel frame supports heavy loads and resists mishandling, and the racks can store 4-person or 2-person UTVs. The racks feature a tread deck, a locking ramp and gate at each end, and 4-way forklift access. Six tie-down hooks secure the vehicles during transport.

Your local Spacesaver military consultant can provide more details about this storage solution, as well as space planning insights to help optimize space in your warehouse.
