Capital Health

THE GOLD STANDARD

Capital Health Medical Center - Hopewell is a new 223-bed hospital on 165-acres that offers innovative amenities like daVinci® robotic surgery and patient concierge services. The hospital was founded to compete successfully in a market that includes New York City and Philadelphia health systems. President of Guardian Medical Systems, Flynn Hudson partnered with Director of Pharmacy, Chester Lau on a major installation for the hospital. With the support of Hamilton Casework Solutions, they developed a 846 SF retail and 8,536 SF central pharmacy that matches the high aesthetic and functional standards set by the hospital.

HAMILTON products addressed a number of common hospital pharmacy issues in this project:

1. A 500 sq. ft. ante room is the only access to the adjoining clean room, providing another line of defense against infection. The ante room features a two-way stainless steel storage unit built into the wall where IV solutions and other supplies may be unpacked by technicians and loaded into the cabinet without entering the ante room and compromising the air with cardboard or microbial particles.
2. Neonatal Intensive Care has its own compounding room equipped with a medication pick station, glove box, sink, under-the-

counter refrigeration unit, desk with generous work surface and storage.

3. Two walls of storage shield the open order entry area from the noise and heat of nearby carousels and refrigerators. Staff pharmacists work at their desk computers and make phone calls in comfort while retaining easy access to medications.
4. The phenolic resin work surface in the retail and work pharmacies offers the ultimate in chemical resistance and durability. Stray white pills pop on the black work surfaces.
5. Slanted removable panels under the sinks protect staff from hot pipes and meet ADA requirements.

Hamilton Casework Solutions offers the precision of manufacturing with a handcrafted look. Our Project Management Team is dedicated to providing valuable assistance and expert consultation to the dealer every step of the way in completing complex installations like this one. "Life is so much easier in this new environment," says Chester. "Flynn is extremely detail-oriented and resourceful. He understands compliance issues. His numerous recommendations readily facilitated smoother operations."

Hamilton Casework Solutions offer GREENGUARD Gold certified products to provide safe, quality, environmentally friendly workspaces. FSC® (FSC-C110583) and OSHPD certified components are also available as specified by a designer.
