

GENIUS MOVABLE WALL

A smart way to manage space

The humble wall – you may know it as a way to create privacy or segment space. But when you're talking about modular walls, there is a lot more to it than just that!

Using customizable designs and configurations, **Genius** movable walls from KI can help you render highly useful spaces throughout the floor plan. Now it is simple to create streamlined workstations, training rooms, conference rooms and more.

Genius movable wall is designed to be durable and can be integrated with existing furniture and architectural styles. A wide array of options, textures, colors, material types and door styles provide a great deal of flexibility. Choose from frame materials of solid wood to anodized aluminum, panels from glass or veneer; door types from swinging or sliding and hardware that is exposed or hidden. The range of options increases the potential of your designs.

By using ecologically sound manufacturing processes and construction materials, **Genius** is friendly to the environment and designed for sustainability. Glass options allow plenty of daylight into interior spaces and the use of sliding doors can help shrink the office footprint.

Features of the Genius:

- » Integrates with furniture and architectural elements
- » Offers noise reduction
- » Brings daylight into interior spaces with use of glass
- » Delivers power and data
- » Offers a variety of materials for frames, panels and doors
- » Provides durability and years of use
- » Comes with a 10-year warranty on most items

It's time to re-think what you think about walls. When you are looking for innovative and flexible conference rooms, workstations, training rooms and other office spaces consider Genius movable walls.
