

LIGHTLINE MOVABLE WALL

Let the daylight in

The humble wall – you may know it as a way to create privacy or segment space. But when you're talking about modular walls, there is a lot more to it than just that!

Using customizable designs and configurations, **Lightline** movable walls from KI can help you render highly useful spaces throughout the floor plan. Now it is simple to create streamlined workstations, training rooms, conference rooms and more.

Lightline movable wall is a pre-assembled, glass wall system designed to enhance and share light. **Lightline** offers a thinner profile by using ½" thick glass, and seamless glass joints allow for better light distribution and brighter workspaces. With no vertical posts needed, you can create a space with no visual breaks.

Lightline is versatile and adaptable and integrates with permanent construction and existing architecture. It can also be integrated with **Genius** movable wall. The ½" thick glass is rigid and aids in the absorption of sound. The aesthetics are maintained with beautiful hardware, full height sliding glass door mechanisms and passive top and bottom channels.

Features of the Lightline:

- » Integrates with permanent construction, existing architecture and Genius movable walls
- » Features ½" thick glass and is factory assembled
- » Provides better light distribution with seamless glass joints
- » Offers flexibility and reusability
- » Features versatile door types include sliding or hinged
- » Includes glass corners or 3-way connections standard
- » Comes with a 10-year warranty

It's time to re-think what you think about walls. When you are looking for innovative and flexible conference rooms, workstations, training rooms and other office spaces consider Lightline movable walls.
