OPTIMIZE YOUR EQUIPMENT ROOM

Team spirit and dedication run deep, even behind the scenes. Champion teams' commitment to excellence is especially evident in their equipment rooms, where well-organized storage systems ensure that athletes and coaches have everything they need to stay safe and perform their best.

Whether you're designing a new facility or improving the layout of your current equipment room, we're here to help you protect gear, keep it organized, and work more efficiently. That's even more important when sanitation and organization are essential to the health of athletes and staff.

With support from your local Spacesaver consultant and a variety of purchasing options, you can design systems to help ensure your athletes, coaches, and staff have everything they need to stay safe and perform their best.

✓ SAVE SPACE

- » Store more gear in a smaller footprint
- » Eliminate wasted space in idle aisles
- » Optimize every cubic inch

✓ SAVE TIME

- » Access gear right away
- » Simplify inventory
- » Streamline workflows

✓ PROTECT GEAR

- » Prevent damage
- » Avoid loss
- » Lock down extra-valuable items

✓ CREATE A SHOWPLACE

- » Add graphic wraps or choose from our full line of colors
- » Create custom electronic control graphics
- » Impress recruits and improve team morale

✓ MECHANICAL ASSIST SYSTEMS

- » Move thousands of pounds with minimal effort
- » Lock aisles to prevent unexpected movement

✓ POWERED SYSTEMS

- » Open aisles with the press of a button
- » Limit access to authorized users
- » Ensure safety with advanced features

✓ HALF-HEIGHT SYSTEMS

Create a work surface while providing storage underneath.

✓ STORAGE DOUBLES AS DISPLAY

This Spacesaver system is adjacent to a large display window. It's a great way to welcome players to the training facility while also providing convenient compact storage near the locker room.

✓ KEEP IT SECURE

Equipment can get “borrowed” or lost. Lock it down with secure solutions.

✓ SAFETY FIRST

In fact, Spacesaver's Powered Systems' built-in safeguards help prevent users from getting trapped or injured by the moving system. A passive, in-aisle safety system stops carriage movement – **automatically and instantly** – when a person enters a moving aisle and prevents movement if a person or object is detected in an open aisle.

- » Hanging rods
- » Shelving with dividers
- » Belt storage

✓ **PLAYER-SPECIFIC STORAGE**

Keep players' gear organized at home and on the road.

- » Wire baskets
- » Dividers for helmets

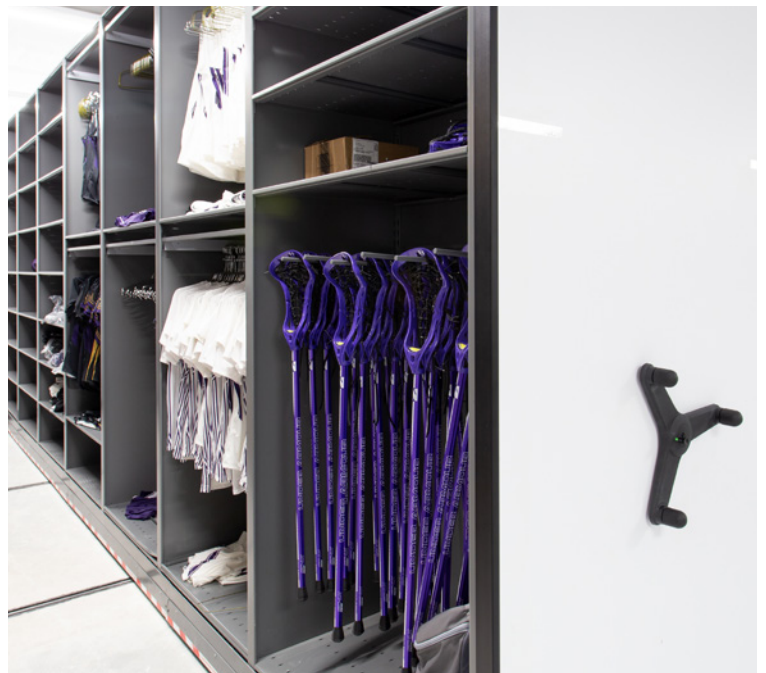

✓ SPECIALIZED EQUIPMENT

Efficient storage for any type of gear.

- » Shoulder pads
- » Hockey sticks
- » Lacrosse sticks
- » Bats

✓ BALL STORAGE

Retrieve and replace balls quickly and easily.

✓ SPORTS MEDICINE

Get quick access to everything you need to keep athletes strong and healthy. By optimizing storage space, you can free up more room in the clinic for consultations and workouts.

✓ FLEXIBLE STORAGE

With gear constantly coming in and out of the equipment room, gear carts offer convenient, transportable storage right where you need it.

Reconfigure shelving on the fly, without special tools.

✓ CUSTOM SOLUTIONS

Does your team need custom storage solutions? We work with coaches, athletes, and equipment managers to design complete storage systems that are a perfect fit.

To minimize the distance athletes and caddies have to carry bags, clubs need to be stored in an area that's convenient to golf carts. In a cart-accessible garage located close to the course's entrance, 240 golf bags are stored in an organized, secure, and visually appealing way.
