

ActivRAC[®]

MOBILIZED STORAGE SYSTEM

UNCOVER SQUARE FOOTAGE YOU DIDN'T KNOW YOU HAD.

ActivRAC® Mobilized Storage System - simple to install, easily handles materials of different sizes and weights, and delivers a prompt payback.

Unlike the traditional static storage concept, mobilized storage systems require just one moving aisle that opens and closes only where and when needed to provide full accessibility to all materials for quick, safe retrieval.

Gain more value-generating floor and workspace under the same roof simply by placing your existing industrial shelving or pallet racking on our industrial-grade carriages and rails.

It's a simple solution inherently designed to maximize your space. ActivRAC® Systems can help lower your production costs, improve your productivity and output, and better control and organize your raw materials, work-in-process, finished goods, and essential support materials.

Depending on the weight of your stored items, choose from our ActivRAC 3, 7, 16, or 30 Mobilized Storage Systems.

No matter which system you choose, you can be assured that your ActivRAC is safe, robust, and engineered to withstand years of constant use. Operate your system with a mechanical assist handle that moves thousands of pounds with minimal effort, or with an electronically powered system that opens aisles with the press of a button or wave of the hand.

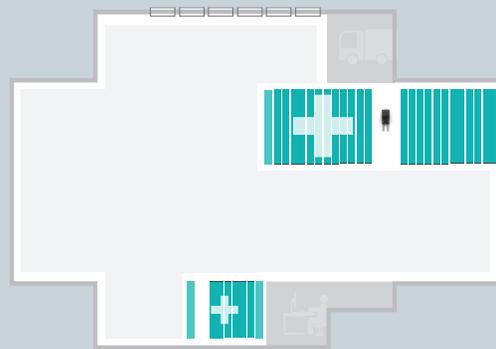

STATIC STORAGE

Wasting space.

With its multiple space-consuming aisles, conventional static racking wastes a significant amount of space you could be using for storage.

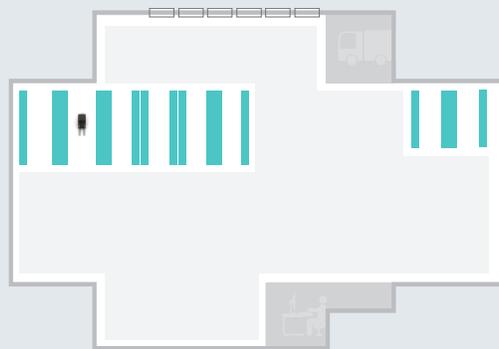

ActivRAC MOBILIZED STORAGE SYSTEM

Increasing storage.

With ActivRAC® Mobilized Storage Systems, one moving aisle replaces multiple dedicated aisles, creating up to 100% more space for more racking or shelving units, in the same footprint.

VS

Limiting profits.

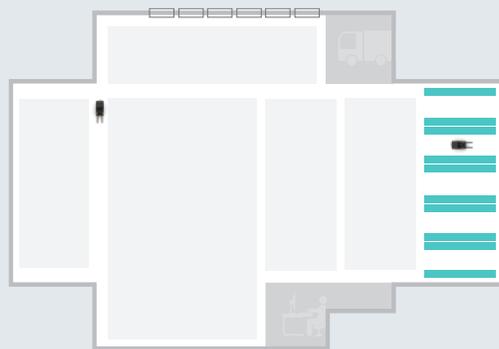

Static racking takes up valuable floor space that could be devoted to a production line or other value add activities instead of storage.

Increasing revenue.

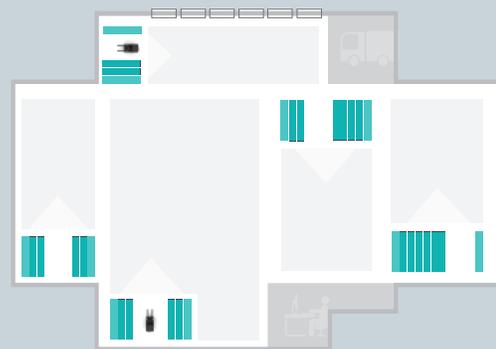

By eliminating the need for multiple aisles, ActivRAC Systems can free up as much as 50% of your existing storage space for revenue-generating activities without expanding into new space.

VS

Wasting time.

When essential supply materials are poorly located or not consolidated, it means extra work for your employees and an inefficient use of their time.

Organizing materials.

ActivRAC Systems allow you to strategically store and organize necessary supplies and materials close to your employees, so they can work more efficiently.

VS

ADD SPACE WITHOUT EXPANDING.

Even under mezzanines, ActivRAC® can solve storage challenges. Its innovative carriage systems “mobilize” your materials — while allowing complete access and productive logistic solutions.

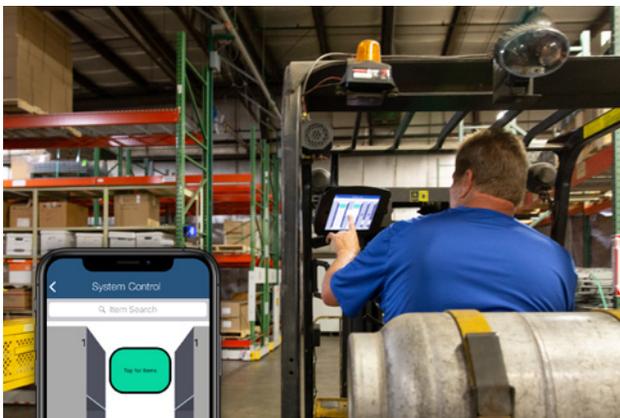

Double your storage capacity in the same footprint.

Whether you operate one lift truck or an entire fleet, ActivRAC® Mobilized Storage Systems offer you up to 100% more storage capacity in the same square footage.

They can be customized and reconfigured to meet today’s—and tomorrow’s—heaviest demands on your bottom line, such as increased SKUs or consolidated storage. With all faces accessible, they provide 100% access to stored materials, so they won’t slow down your picking rate.

A variety of control options allows users to open any aisle at the point of need. Mechanical-assist handles move thousands of pounds with minimal effort, and powered systems can be operated by touchpad control, radio frequency remote, Gesture Control™ or the TUSC® Control app.

And with the extra space and storage capacity you gain, you won’t need to build or lease additional space.

Save time with the TUSC® Control app, which allows users to search for inventory and operate aisles from up to 100 feet away.

ActivRAC[®] 30P

MOBILIZED STORAGE SYSTEM

- 30,000-Pound Capacity Per Rack Section
- Motorized, Electric Push-Button or Gesture Control™ Operation
- Structural Footings and Leveled Rail

MAKE ROOM FOR MORE REVENUE.

Expand production into the space you save with mobilized storage systems.

The best solutions are often right under your nose—or your roof.

A Spacesaver Mobilized Storage System frees up as much as 50% of the space of conventional static storage. So you can convert unprofitable aisles into profitable workspace—expanding production and boosting output without breaking new ground.

Whether you want to add another product or production line, or establish an entirely new profit center, it's easy when you upgrade to mobilized storage.

Spacesaver's **ActivRAC**® 16P System is ideal for heavy applications and features aisle activation via app, touchpad, Gesture Control™, and RF remote. Every system is custom designed to fit around columns or other structural constraints.

An ActivRAC System can be configured to your application with just one access aisle to accommodate existing fork trucks and pallet racks, to enhance your productivity and reduce driver damage. Remote aisle operation and a fast aisle-opening cycle time helps you maintain or improve your throughput of puts and picks.

Installed on existing concrete slabs, our ActivRAC 16P Mobilized Storage System requires no costly structural footings or leveling. It's designed to articulate over reasonably unlevel flooring, while providing smooth operation.

ActivRAC[®] 16P

MOBILIZED STORAGE SYSTEM

- 16,000-Pound Capacity Per Rack Section
- Unleveled, Surface Mount or Recessed Rail
- Safe, Efficient Programmable Controls

JUST WHAT YOU NEED. RIGHT WHERE YOU NEED IT.

Increasing storage space for essential materials such as dies or tooling in zoned work areas boosts overall capacity and output.

Putting critical supplies right at your employees' fingertips streamlines workflow and productivity.

Store and organize essential materials at the point of use.

Eliminating unnecessary motion and keeping on hand only what is needed to complete a task are fundamental to efficient workplace organization and greater productivity, quality, and output.

With ActivRAC® Mobilized Storage Systems from Spacesaver, you can decentralize low-turn and essential support materials—like packaging, service parts, product samples, tooling and fixtures, and maintenance support equipment and supplies—and locate them where they're most needed so you maximize both your space and your control over workflow efficiencies and throughput.

MOBILIZED STORAGE SYSTEM

- 7,000-Pound Capacity Per Rack Section
- Unleveled, Surface Mount or Recessed Rail
- Easy Mechanical Assist Operation

CUT AISLES, NOT CORNERS.

Tap into our storehouse of expertise.

With over 400,000 successful commercial and industrial storage installations, Spacesaver brings more than 50 years of innovative leadership to your storage needs.

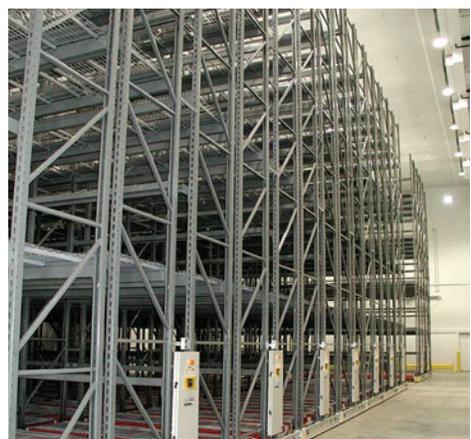

You benefit from the collective experience of the industry's most advanced team of application storage solution specialists, including a local team of factory-trained and certified installation and service professionals. Spacesaver handpicks its highly trained, industry-specific distributors and offers installation processes designed to be as quick and unobtrusive as you could hope for.

From the outset, Spacesaver storage solution specialists provide expert space assessments and ROI evaluations to design the optimal system—taking into account all of your operational goals and needs, including assisting you and your local experts in addressing fire protection, floor requirements, and safety considerations.

For a qualified, professional assessment of your storage and operational needs, call 800.492.3434 or visit www.spacesaver.com.

Our certified team of professionals helps make installation of your ActivRAC System smooth, swift, and seamless.

Offering the industry's leading applications expertise, our storage solutions specialists can design and implement a mobilized storage system - like the one above - for your specialized applications.

Create the aisle access you need and nothing more.

Designed to fit your space's exact needs.

Fully customizable shelving options.
