

SHARKCAGE®

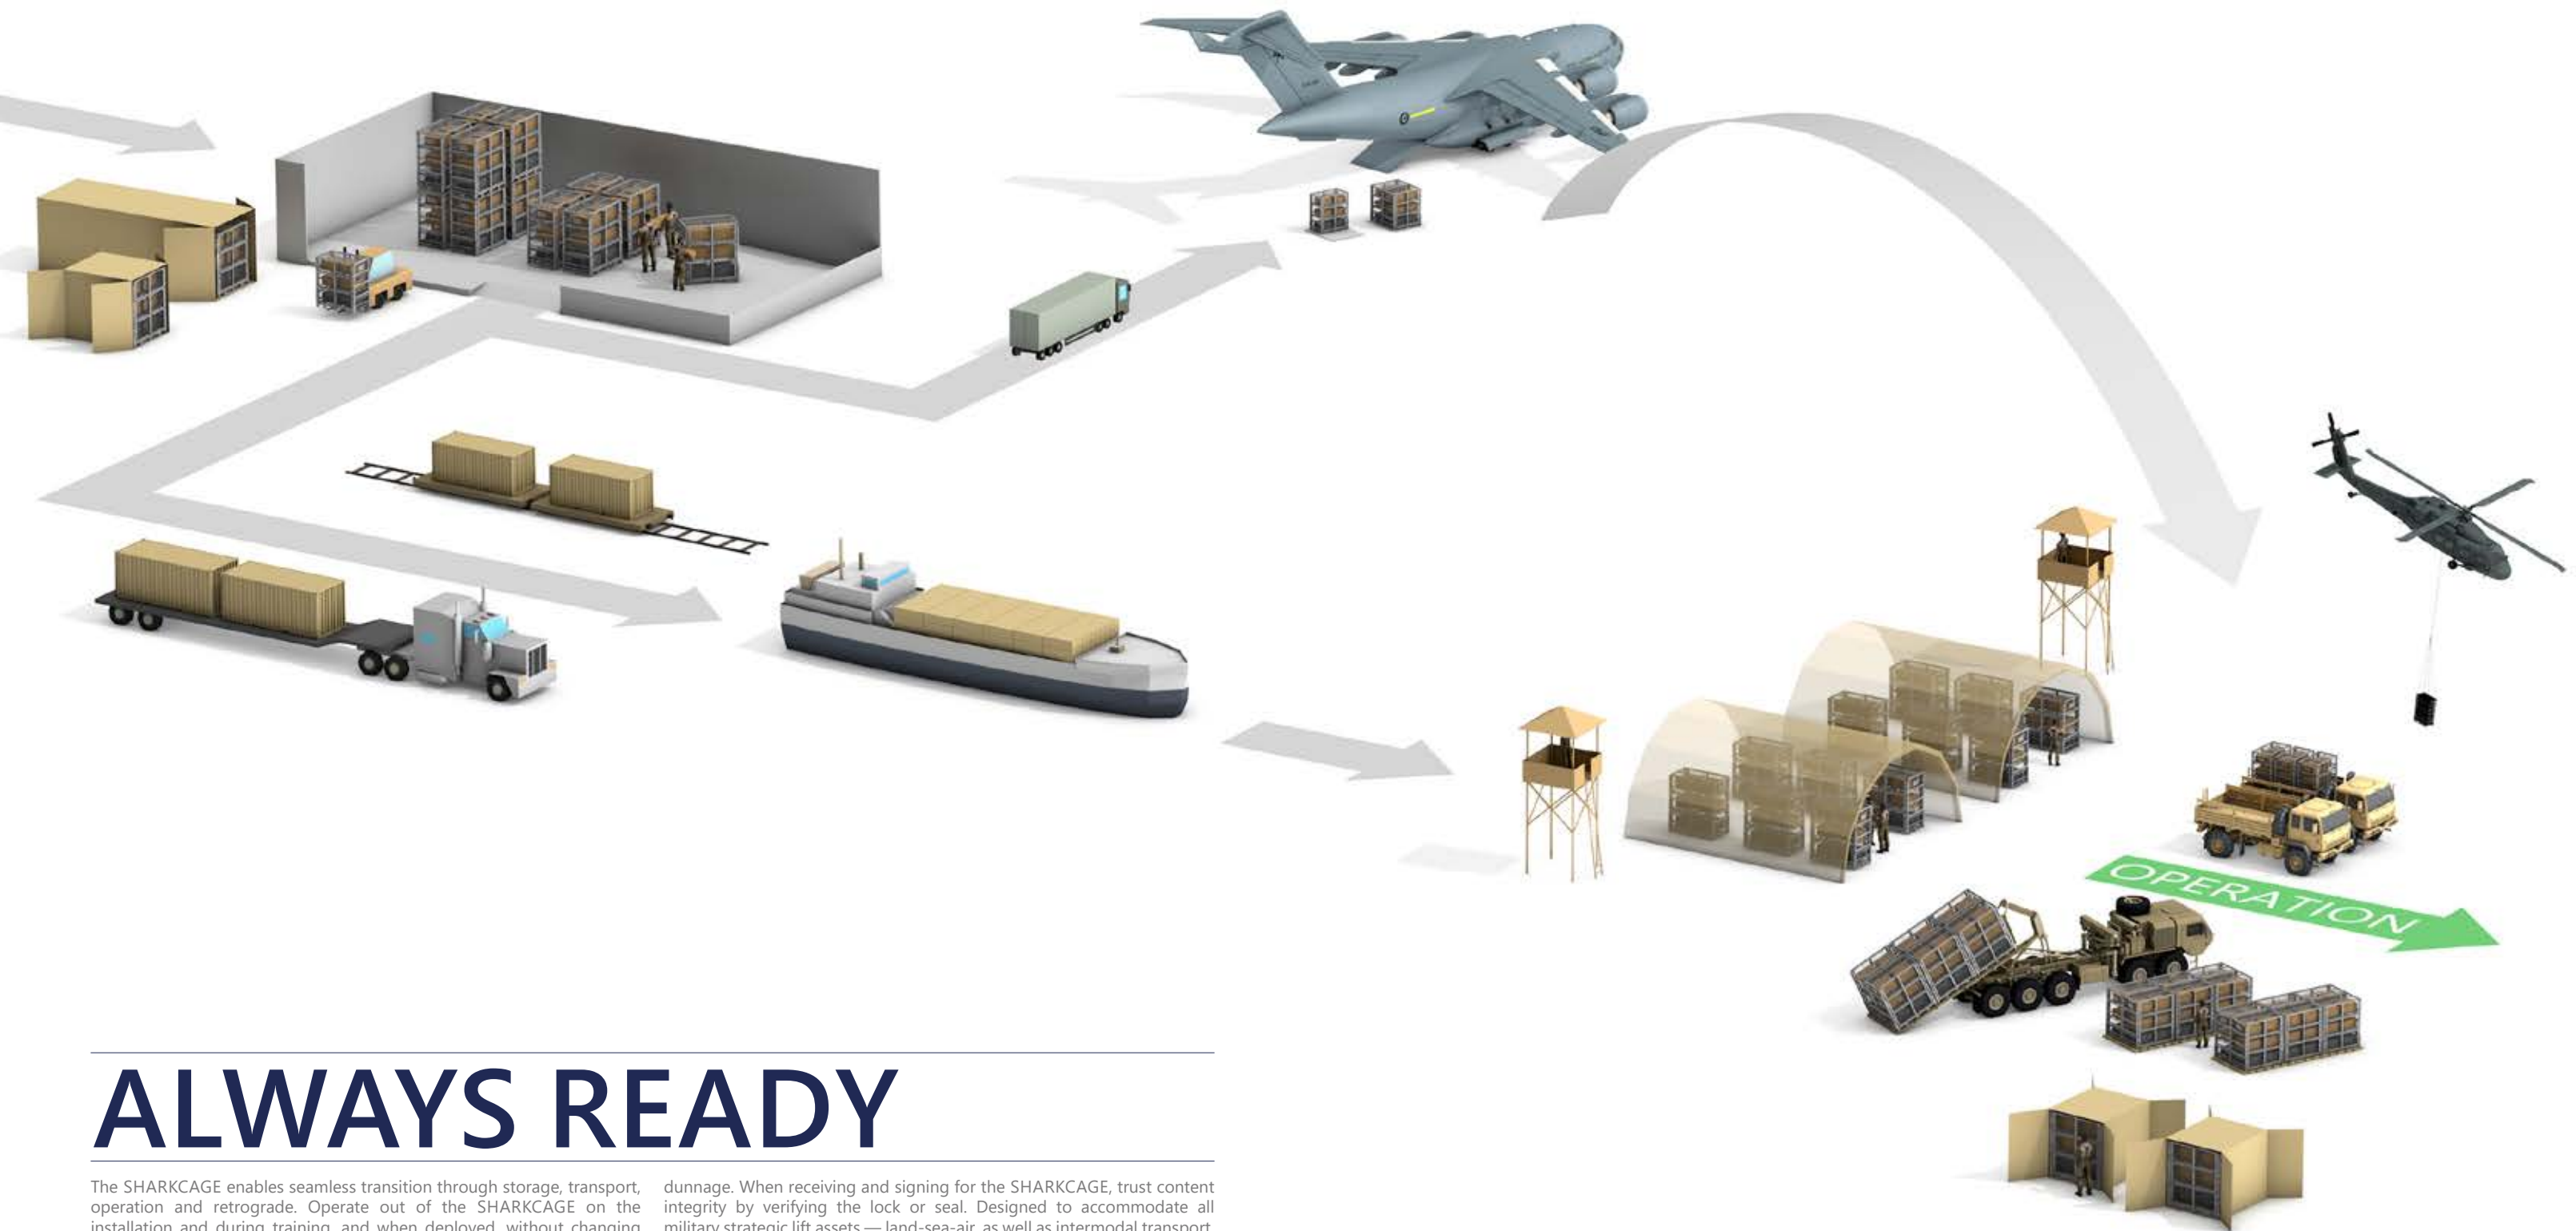

PRODUCT CATALOG

YEARS OF STUFF

TRAIN AS YOU FIGHT

FIGHT AS YOU TRAIN

ALWAYS READY

The SHARKCAGE enables seamless transition through storage, transport, operation and retrograde. Operate out of the SHARKCAGE on the installation and during training, and when deployed, without changing the SOP.

Secure the cage with standard padlocks and load the SHARKCAGE directly into any available transport platform in minutes with minimal need for

dunnage. When receiving and signing for the SHARKCAGE, trust content integrity by verifying the lock or seal. Designed to accommodate all military strategic lift assets — land-sea-air, as well as intermodal transport.

The SHARKCAGE will increase flexibility across the entire supply chain.

MOBILITY

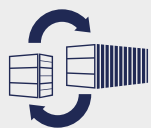

TOPLIFT

Reinforced corner posts and connection points to accommodate crane, helicopter lift and UNREP according to MIL-STD-913A, -209K and -648D. Weld seams inspected according to RCX-3 to ensure safety.

LAND-SEA-AIR

Shelves, panels and doors do not move even with negative G-forces (upside down). Strong enough for all modes of strategic transport; designed according to MIL-STD-1791D, -1366E and STANAG-3400.

INTERMODAL

Transition seamlessly from one mode of transport to the next according to the definition in MIL-STD-3028.

FORKLIFT

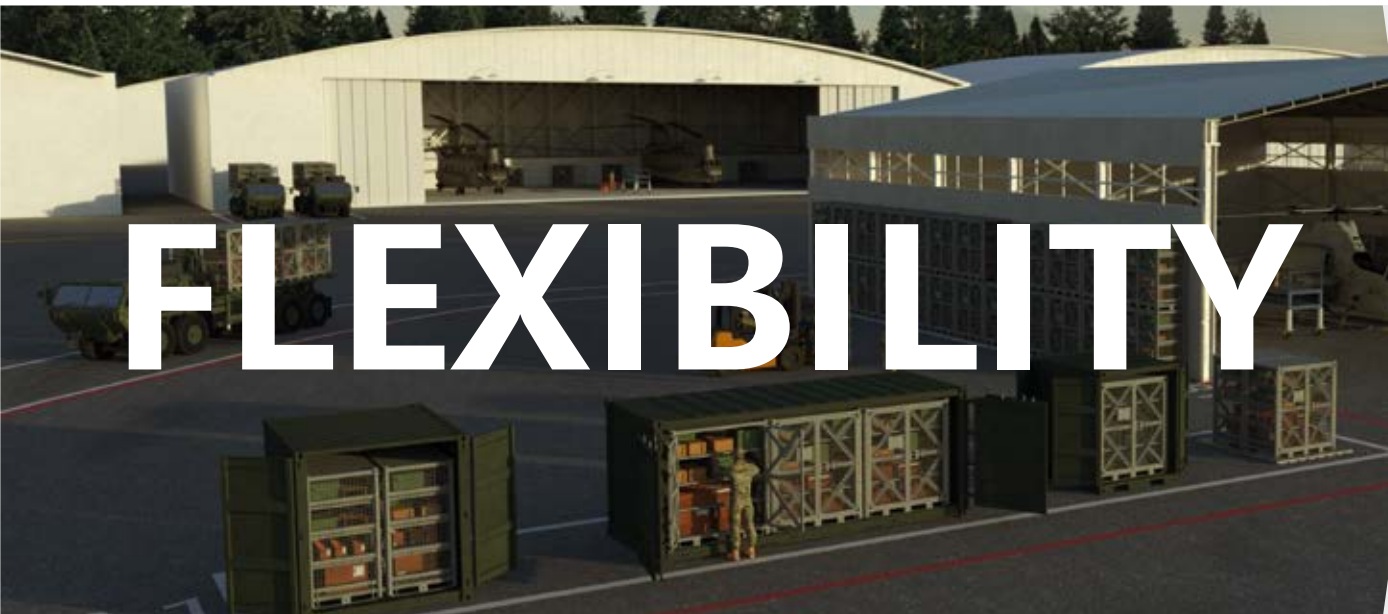

Four-way forklift capability compatible with most pallet jacks and forklifts. Designed to fulfill both the STANAG-2828 and 2829, as well as MIL-STD-648D, to ensure operability in joint operations.

MINIMAL DUNNAGE

Secured in containers with minimal, if any, need for wooden bracing.

▲ FEATURES SHARED BY ALL SHARKCAGES ▼

FLEXIBILITY

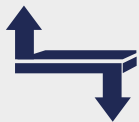

MOVABLE

Rearrange the warehouse without packing and repacking the cages.

STACKABLE

Self-centering corners to ensure safety and efficiency in stacking.

ADJUSTABLE

Adjust shelves to the desired position without tools.

NO TOOLS

No tools required for assembly, disassembly or reconfiguring of shelf positions.

CONTENT VISIBILITY

See-through grid enables content visibility at all times. Optional covers are available to temporarily limit visibility.

▲ FEATURES SHARED BY ALL SHARKCAGES ▼

SECURITY

LOCKABLE

Lock using standard issue series 5200 padlocks.

PROTECT

Prevent content from shifting during transport by utilizing strapping points on the inside of the cage and simplify compliance with MIL-HDBK-701.

SAFETY

Increased handling safety for personnel as content is constrained, even if dropped or tipped.

DURABLE

Extra high-strength steel and hot-dip galvanization to withstand any type of climate, handling or even fire.

ANTI-SPARKING

Hot-dip galvanization completely removes risk of sparks from metal-to-metal contact.

FEATURES

SC-TL-MD-2D-03

DESCRIPTION

The TACTICAL LOCKER has double doors secured by one standard padlock. The unique design ensures high capacity-to-weight ratio and maximum internal-to-external volume.

Shelves can be taken out, and the cage has multiple shelf positions.

SUITABLE FOR

Everyday access to tools, spare parts, dive gear and supplies, with the possibility of securing the equipment quickly.

TACTICAL LOCKER CW

SHARED
FEATURES

SC-TL-WL-2D-03

DESCRIPTION

The TACTICAL LOCKER CW (Container Warehouse) is made to fit in a 10ft (BICON) or 20ft container and use the blocking and bracing to keep an aisle open between the cages, even during transport. This makes it possible to use a standard container as a mobile warehouse and access equipment immediately after download or even during transit.

These cages are also popular outside the container because the depth is perfect for many storage situations and most content.

Shelves can be taken out and the cage has multiple shelf positions.

Some of these lockers come with panel doors that can be taken off, which is practical when space is limited or when the content is seldom secured. If the content should often be secured, a hinged door is better.

SUITABLE FOR

Storage inside containers, when aisle space is limited, or for storage situations outside the warehouse where the shallower depth is more suitable.

HALF GATE (HG)

SC-BA-XL-GT-01

4 EA SC-BA-MD-GT-01
IN A TRICON CONTAINER

DESCRIPTION

The TACTICAL BASKET has a gas spring-assisted top lid and front gate that are secured with one standard padlock.

The gate can be used to roll tents or covers into the cage, or to simplify walking into the cage when stacking equipment. The gate is also detachable.

The HALF GATE (HG) version has a gate which folds down. This makes it easier to access equipment inside the cage, especially if it is stacked. This gate is not detachable.

For all TACTICAL BASKETS we have both full and half gates available, but the version not listed here is in the *SPECIAL ORDER* section (p. 24).

SUITABLE FOR

Covers, tents, parachutes and other large items.

T-RAX STACK RACK

FEATURES

COLLAPSIBLE

TX-SR-XX-ST-91

DESCRIPTION

STACK RACK has two detachable end walls and a detachable grid wall in the back. It is assembled in minutes. Accommodates two pallets side by side, with ample room for slack. Collapsible to a height of 11", making it possible to fit 28 ea flat-packed into a 20ft container and 80 ea into a 40ft container.

The STACK RACK comes with standard hot-dip galvanizing, like our other cages, but can be painted red horizontally and blue vertically for increased safety in the warehouse. A grid back wall is included, which prevents loose items from falling off the back.

SUITABLE FOR

Temporary and deployed warehouses, but standard warehouses could also benefit from the flexibility of the STACK RACK.

Accommodates EURO pallets, US military standard pallets and most other common pallets in the US.

STACK RACK XXL+

PC: TX-SR-XX-ST-91

Size (W/D/H) 115/44/60 [in] | 293/113/152 [cm]

Description Fixture to secure the bottom cage to the ground and bolt the column of cages together, top to bottom, left to right, and back to back.

SC-CW-MD-2D-03

SHARED FEATURES

HINGED DOORS

LOCKABLE COMPARTMENT

DESCRIPTION

Our TACTICAL LOCKERs on wheels are our most flexible and feature-rich cages. They come with wheels, weather cover, blocking and bracing system, an integrated function to lock cages together or to a wall and a wall bracket.

For security reasons there is a wheel brake which can be locked in applied status, like a hand brake, making it possible to unlock by opening the door only. This makes the cage stationary when needed.

The integrated connection mechanism makes it possible to connect cages together at the bak or side. And the same connection mechanism can be used with an included wall bracket. The connection mechanism can only be relaxed by opening the cage.

The cage comes with blocking and bracing to transform a TRICON or 20ft container into a mobile warehouse or arms room.

The cages are low enough to go through man doors and the cargo net on the roof makes it possible to use the extra space on the top when in a container.

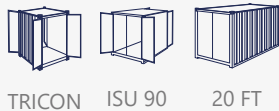

SUITABLE FOR

Weapon storage, maintenance operations and everyday storage.

TACTICAL LOCKER CWM

PC: SC-CW-MD-2D-03

Size (W/D/H) 41/26/75 [in] | 105/67/191 [cm]

Capacity 2,500lbs | 1150 kg
Shelves Four levels

FEATURES

ADAPT TO WHEEL SIZE

VERTICAL STORAGE

DESCRIPTION

The Wheel Storage and Transport cages can secure military wheels in a vertical position during storage and transport. All cages adapt to different size wheels and secure the wheels in all directions.

All cages have a pivoting front gate which simplifies rolling wheels in and out of the cage and the gate then secures the wheels from rolling out. The top construction moves up and down to prevent the wheels from falling out of the cage in transport.

SUITABLE FOR

Units and warehouses that store and deploy with large amounts of wheels. Enables compliance with vertical stacking requirement. The WST LARGE accommodates wheels between 32" and 55" in diameter, the WST SMALL even heavier wheels between 35" and 54" and the WST XS smaller wheels such as figter jet and helicopter wheels.

WST XS

PC: SC-WS-XS-TP-01

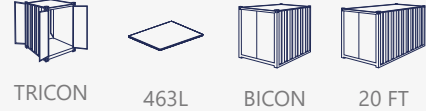

Size (W/D/H) 44/39/39* [in] | 112/100/100* [cm]
Weight 190lbs | 85kg
Capacity 1,000lbs | 450kg
Accommodates wheels 15" to 35" in diameter

WST SMALL

PC: SC-WS-HD-TP-01

Size (W/D/H) 44/55/67* [in] | 111/139/170* [cm]
Weight 400lbs | 175kg
Capacity 5,000lbs | 2000kg
Accommodates wheels 35" to 54" in diameter

WST LARGE

PC: SC-WS-LG-GT-01

Size (W/D/H) 84/43/44* [in] | 213/110/111* [cm]
Weight 465lbs | 200kg
Capacity 3,000lbs | 1350kg
Accommodates wheels 32" to 55" in diameter

*Adjustable height based on wheel size

DESCRIPTION

Flexibility is key, which is why we made it the guiding principle when designing the SHARKCAGE WEAPON STORAGE SYSTEM. With only three accessories and one cage it is possible to store most, if not all, US Military issued weapons.

SUITABLE FOR

All weapons in use by the US Militar and all weapons tested by European forces.

“Total game changer!”

-XO from Ft. Carson
after overseas deployment

CWM WEAPON RACK

PC: SC-AC-CW-MD-60

Size One to three fits in each TACTICAL LOCKER CWM depending on intended weapon.
Weight 55lbs | 25kg
Capacity 9 or 12 Weapons (reconfigure without tools)
Fits M4, M7, M16, MP5, SA-80, C7A2, C8A2 (12 ea), and HK416D10, M240, M249, M250(6 ea) +
Includes Top and bottom section and installation hardware.
Description Mounts inside the cage without tools. Change the distance between the top and bottom part to adapt to different weapons. Lockable with a padlock.

ACCESSORY

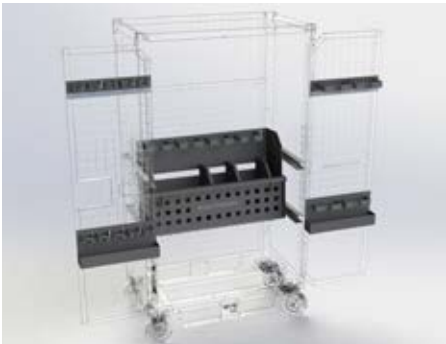

CWM DRAWER

PC: SC-AC-CW-MD-62

Size Five fits in each TACTICAL LOCKER CWM
Weight 55lbs | 25kg
Capacity 30 ea pistols or up to 150lbs | 75 kg
Fits Sig Sauer P320 M17, Sig Sauer P228, Beretta 92 FS, Glock G17, G18, G26 and more.
Includes Three removeable pistol foam inserts and reconfigurable internal divider.
Description Heavy-duty stainless steel rollers, Linex covered compartment with two removable foam inserts with precut pistol compartments.

ACCESSORY

CWM CREW WEAPONS HOLDER

PC: SC-AC-CW-MD-61

Size One fits in TACTICAL LOCKER CWM, with extra space underneath or on top for other gear.
Weight 90lbs | 40kg
Capacity Up to four heavy-weapon systems, four barrels on each door, or a tripod on each door
Fits M2, Mk19, 60mm mortar, 81mm mortar and more.
Includes Bottom cradle with movable divider walls and barrel holders with straps on each door.
Description Move the divider walls inside the cradle to get the desired width for the intended weapon and secure firmly with straps. Barrels or tripods can be secured on the doors.

ACCESSORY

SC-TL-MD-2D-03 WITH BR-WS-04-03-81

CWL WORKSTATION
SC-TL-WL-2D-03 WITH BR-WS-03-03-81

MEDIUM WORKSTATION
SC-TL-MD-2D-03 WITH BR-WS-04-03-81

DESCRIPTION

The WORKSTATION or BOX-RACK can be added as an accessory to a TACTICAL LOCKER and works as drawers. Easily pull a box out and bring it to the operation. The sliding mechanism is made without moving parts, which makes it very durable even in wet or dusty environments.

The WORKSTATION has a BOX-RACK and a fold-down or pull-out table. The MEDIUM WORKSTATION has a fold-down table and the CWL WORKSTATION table is pull-out.

The standard BOX-RACK works with all the POB-6 boxes. BOX-RACKS for POB-12 and ALUMABOX CW 12 are available on order.

The BOX-RACKS can also work without boxes to compartmentalize a section of the cage.

SUITABLE FOR

Small part storage.

MEDIUM WORKSTATION
SC-TL-MD-2D-03 WITH BR-WS-04-03-81

CWL WORKSTATION

PC: BR-WB-03-03-81

Size Fits in TACTICAL LOCKER CWL and TACTICAL LOCKER WHL CWL
Weight 300lbs | 140kg
Includes Nine POB 6 boxes, some of which has internal dividers
Description Box-rack including heavy-duty plastic boxes, which can be pulled out like drawers. Underneath the box-rack there is a pull-out shelf, which can be used as a work-bench.

ACCESSORY

MEDIUM WORKSTATION

PC: BR-WS-04-03-82

Size Fits in TACTICAL LOCKER MEDIUM
Weight 350lbs | 160kg
Includes Nine POB 6 boxes, some of which have internal dividers and three smaller open boxes.
Description Box-rack including heavy-duty plastic boxes, which can be pulled out like drawers. Underneath the box-rack there is a fold-down shelf, which can be used as a work-bench.

PC: SC-BA-LP-GT-01

Size (W/D/H) 89/45/41 [in] | 225/115/105 [cm]
Weight 565lbs | 255kg
Capacity 4,000lbs | 1750kg
Dividers Available as accessory

Perfect fit for 20ftx8ft containers, with full gate front and gas lift assisted top opening.

TACTICAL BASKET HG XL

PC: SC-BA-XL-HG-01

Size (W/D/H) 84/52/43 [in] | 213/132/110 [cm]
Weight 660lbs | 300kg
Capacity 4,000lbs | 1750kg
Dividers Available as accessory

Perfect fit for for 463L pallets and 20ft containers, with half-gate front and gas lift-assisted top opening.

LOCKER BASKET XL

PC: SC-BA-XL-GD-03

Size (W/D/H) 84/52/81 [in] | 213/132/205 [cm]
Weight 860lbs | 390kg
Capacity 4,000lbs | 1750kg

Perfect fit for 10ft, 20ft and 463L pallet, with gated bottom for bulky items and double doors and shelves above for accessories.

ORIGINAL SMALL

NSN: 8145-01-512-1022, PC: SC-ST-IF-3P-02

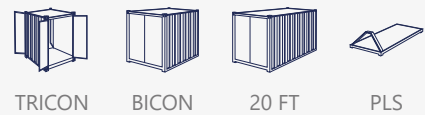

Size (W/D/H) 52/42/62 [in] | 132/106/158 [cm]
Weight 600lbs | 270kg
Capacity 5,000lbs | 2000kg
Shelves Three levels

ORIGINAL MEDIUM

PC: SC-CI-MD-3P-02

Size (W/D/H) 70/41/79 [in] | 178/104/200 [cm]
Weight 650lbs | 290kg
Capacity 5,000lbs | 2000kg
Shelves Three levels

ORIGINAL LARGE

PC: SC-CI-LG-4P-02

Size (W/D/H) 84/43/85 [in] | 213/110/216 [cm]
Weight 960lbs | 440kg
Capacity 5,000lbs | 2000kg
Shelves Four levels

ORIGINAL XXL

PC: SC-CI-XX-4P-02

Size (W/D/H) 104/42/85 [in] | 265/107/216 [cm]
Weight 1300lbs | 590kg
Capacity 5,000lbs | 2000kg
Shelves Four levels

WST A SMALL

PC: SC-WS-HD-TP-80

Size (W/D/H) 44/55/67* [in] | 111/139/170* [cm]
Weight 460lbs | 210kg
Capacity 4,000lbs | 2000kg
*Adjustable height based on wheel size

Identical to the WST II (SC-WS-HD-TP-01), but with a plated top and a middle divider between the two-wheel positions. All bolts are welded on to reduce the risk of FOD.

MEDIUM WST INSERT - ACCESSORY

PC: SC-TL-MD-2D-WT, FOR TACTICAL LOCKER MEDIUM SC-TL-MD-2D-02

Size (W/D/H) 65/37/2 [in] | 164/95/6 [cm]
Weight 71lbs | 32kg
Capacity 1,000lbs | 500kg

Special rack for storing and securing wheels in the TACTICAL LOCKER MEDIUM. Comes with two movable vertical dividers.

MEDIUM HAZMAT INSERT - ACCESSORY

PC: SC-HZ-MD-55-04, FOR TACTICAL LOCKER MEDIUM SC-TL-MD-2D-02

Size (W/D/H) 62/35/8 [in] | 158/90/21 [cm]
Weight 310lbs | 140kg
Capacity 1,500lbs | 700kg

Collects spills from up to 55 gallon drums. Easily insert into the TACTICAL LOCKER MEDIUM with a forklift. Can be used on the bottom or on a shelf.

MAINTENANCE

SC-TL-MD-2D-03

With SHARKCAGEs you can secure content by locking the cage, you can move it around with a pallet jack or you can deploy with the entire cage and its contents. For maintenance, this can result in huge process improvements, both when moving the operation and on the installation.

Maintainers we interviewed reported up to 25% improvement for the entire phased maintenance process. The largest improvements came from reduced setup time and reduced walking distance on the installation. During deployment, they reduced packing time by roughly 80%.

FLEXIBLE WAREHOUSE

TX-SR-XX-ST-02

Our STACK RACK makes it possible to set up a pallet rack without tools in minutes; breaking it down, moving it and setting it up again. This flexibility can make the warehouse layout dynamic and easily adaptable to a specific operation and variations in storage need. Flat packing the racks and stuffing a temporary warehouse anywhere in the world, inside or out.

WEAPON STORAGE

SC-CW-MD-2D-03

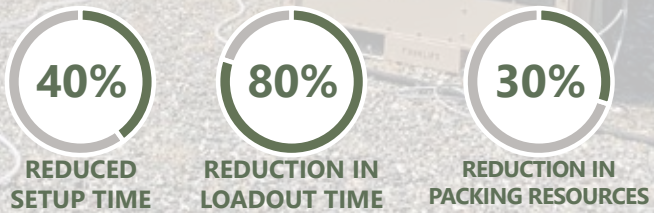

Weapon Storage must be secure at home station, in transit, and when deployed. The SHARKCAGE TACTICAL LOCKER CWM delivers on all fronts. With just one cage and three field-tested accessories, almost all weapons used by U.S. and European forces can be stored safely. It's already in use with units in the U.S., U.K., Sweden, and Belgium. Designed with future-proof flexibility, the system supports both legacy weapons like the M4 and M16, as well as next-gen arms like the M7 and M250. Security features include a lockable brake and the ability to connect cages to walls or adjacent units—none of which can be unlocked without first opening the cage. This ensures compliance with physical security regulations. You can roll the cage into trucks or containers and maintain full security—no repacking required. Whether in the arms room or in the field, this system ensures readiness without compromise.

BASE-IN-A-BOX

SC-BA-XL-GT-01

The modularity of the SHARKCAGEs combined with their mobility capabilities make them ideal for field hospitals, TOCs or other bases which are deployed. Breaking up and packing the load plan in kits makes it possible to rapidly deploy a small or large base from the same stock. The cages also make it easier to repack the content correctly and safely in the field to ensure content does not get lost or damaged.

intermodal

/ɪntəˈməʊd(ə)l/
adjective

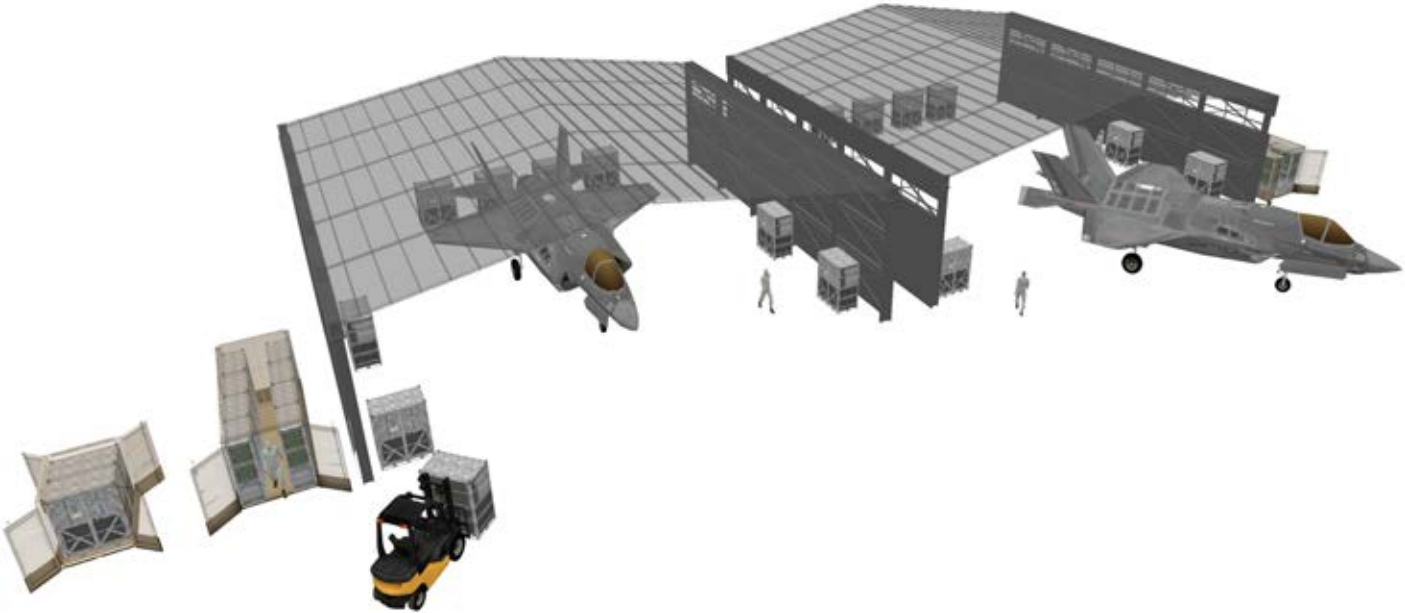

“Intermodal freight transport involves the transportation of freight in an intermodal container or vehicle, using multiple modes of transportation (e.g., rail, ship, and truck), without any handling of the freight itself when changing modes.”

While there is an ideal platform for each SHARKCAGE, each cage still fits very well in several platforms. And the best thing is that there is no need to modify the container or air pallet — simply use standard shipping containers. This makes the SHARKCAGE the most flexible solution available for military logistics. On this page we illustrate how the SHARKCAGE TACTICAL LOCKER MEDIUM fits in different commonly used military platforms.

Free, but powerful online tool to create your own real-life layouts in 2D and 3D with cages, containers, vehicles and buildings. Visualize your load plan, warehouse or maintenance area for better planning. Try it now!

FREE TO USE
NO DOWNLOAD NEEDED

BUILD YOUR LAYOUT

Build your layout with a library of real-size containers, vehicles, people and other objects. Work directly in your browser without downloading any software and see the layout in top view, or directly in 3D view.

ADD SHARKCAGE

Outfit your layout with the SHARKCAGEs you need to get a lean logistic operation. Our product line ensures maximum flexibility and organization in any scenario.

EXPORT THE LAYOUT

Download and review your plan with a table including NSN for each SHARKCAGE and one sheet for each product. Purchase directly from SHARKCAGE or through Governmental agencies: DLA(NSN), DLA(TLS), GSA or MRO.

WE ARE TEAM **SHARKCAGE**

SHARKCAGE is an international company with offices in both the US and EU. We are proud to have the highest percentage of US military veterans in our sales organization compared to any competitor, with our entire sales team bringing military experience to the table.

We manufacture where we find the best balance of quality and cost for each component, sourcing exclusively from Buy American Act and NATO-compliant suppliers—even when not strictly required.

SHARKCAGE has specialized in military logistics and storage solutions for over two decades, working closely with US and NATO forces since 2000. Drawing from this experience, we have continuously refined our products to perform in the most demanding environments, with a design life exceeding 25 years. In 2025, we introduced a Lifetime Warranty for our cages, defining lifetime as a minimum of 25 years.

Developed in accordance with relevant MIL-STDs and STANAGs—and shaped by extensive field testing and feedback—SHARKCAGE products address a wide range of logistical challenges with proven reliability.
