

INFO SHEET

4-POST FREESPAN™ SHELVING

The Future of Your Shelving and Space.

Built on decades of tailoring shelving solutions that meet the most demanding storage challenges, Spacesaver's 4-Post FreeSpan™ Shelving delivers quick and easy adjustability – without the need for tools.

Our patent-pending clip design makes installation effortless and provides unmatched versatility as shelves can be adjusted three times faster than traditional 4-Post Shelving. FreeSpan™ offers exceptional shelf capacity, meets ANSI standards, and is tested to a 2x safety factor. Engineered for durability, it's designed to maximize safety - protecting both stored items and the people who use the system.

FreeSpan is engineered to be **fast, flexible, functional,** and a **fit** for all modern storage needs.

FAST:

Tool-Free Adjustment

With Spacesaver's patent-pending clip design, shelf adjustments are simplified! FreeSpan™ clips are designed with two rivets that securely attach individual shelves to the uprights. The versatile clips engage up or down and left or right to easily and securely connect to any post location.

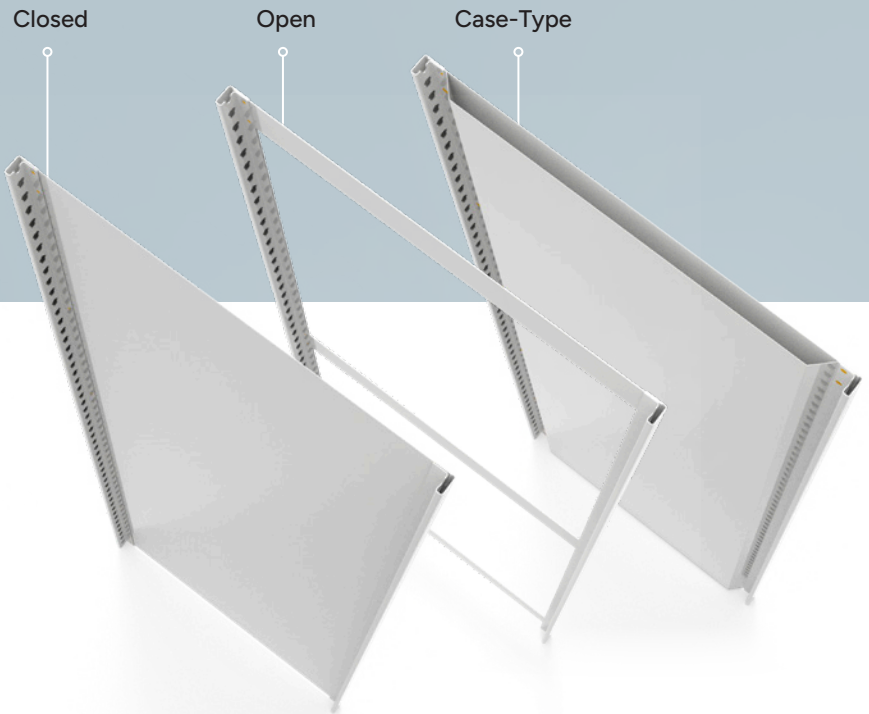

FreeSpan's innovative clip design offers twice the versatility of the 1½" industry standard increment, allowing adjustability at ¾" and the ability to fully maximize the efficiency and storage capacity of your space.

EXPERIENCE **NEXT-LEVEL** STORAGE IN YOUR SPACE.

FLEXIBLE:

Uprights That Upsize Use

4-Post FreeSpan™ Shelving integrates with any upright style needed to store your items. Open uprights offer enhanced visibility and access while Closed uprights provide added security and aesthetics. Our Case-Type uprights' double-walled design extends into the shelf area, preventing stored materials from slipping behind the upright posts.

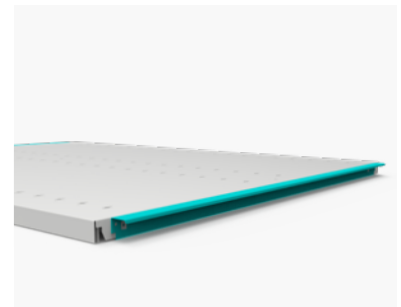

FreeSpan™ Shelf

Designed for easy removal,
just lift up and pull out.

FreeSpan™ Shelf Stiffener

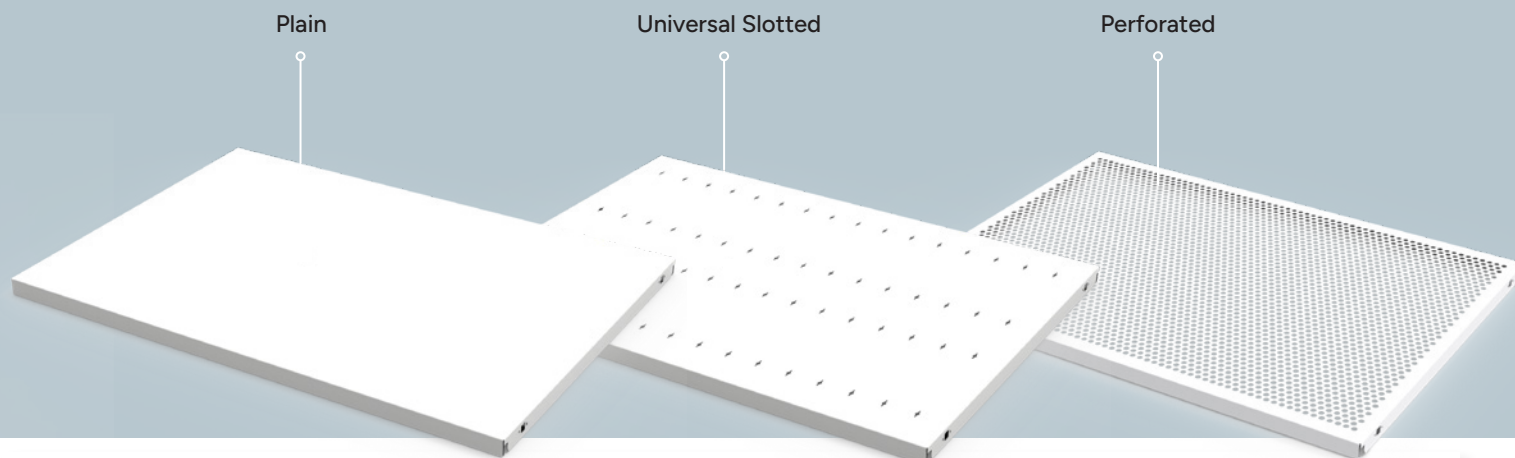

Optional accessory for increased
capacity and strength.

FreeSpan™ Shelf Extender

Optional accessory for increased
safety and security for stored items.

Complete your design with aesthetics that perfectly suit your space. From dozens of powder coat paint colors to wood, laminate, acrylic, and glass end panels, you can ensure your FreeSpan™ system complements your space.

FUNCTIONAL:

Superior Shelves

FreeSpan™ supports countless uses with a variety of shelf types. Available in Plain, Universal Slotted - both available with or without Center Stop holes - and Perforated configurations, FreeSpan's Shelf design allows users to easily remove shelves to make adjustments.

Whether utilizing Single-Face, Double-Face, or Back-to-Back configurations, shelves can be modified and personalized for any need. Optional Shelf Stiffeners boost strength for greater storage capacity, while FreeSpan's patent-pending Shelf Extenders - also available as an option - fill gaps to keep small items secure.

FIT TO WORK:

Maximum Capacity

Made with durable recycled steel, Spacesaver's solutions provide the quality and longevity you need in your storage system. Maximize the functionality of FreeSpan™ Shelving by integrating it into a High-Density Mobile Shelving system or Flexible Shelving unit.

Our innovative clip design allows backwards compatibility, permitting FreeSpan™ Shelving to be integrated into existing Spacesaver 4-Post systems. FreeSpan utilizes our complete range of 4-Post Shelving accessories. These accessories provide the freedom to configure storage systems to exact needs and specifications.
